Introduction

The EPA is promising new restrictions on Greenhouse Gas Emissions (GHG) which have been blamed for global warming. Pennsylvania will feel a big impact on this issue as it is the nations 3rd largest producer of GHG emissions. PACE Environmental Products Inc is proud to present the GHG CO2 CEMS system designed to meet EPA regulations for GHG CO2 monitoring at a price affordable to the consumer. Whether you're a Power Plant, Cement Company, or an Industrial Manufacturer, PACE Environmental Products Inc is your solution for GHG Monitoring.

* Actual CO2 CEMS may differ from image pictured

** Sample distances above 125' may require optional assist pump
